STONES AND GRAVEL

In the Timoradza quarry we have experience in production of stone and gravel products from Dolomite stones. The stones and gravel are **TSUS** certified and come in a variety of different fractions.

PRODUCED IN SLOVAKIA

PRODUCED IN SLOVAKIA

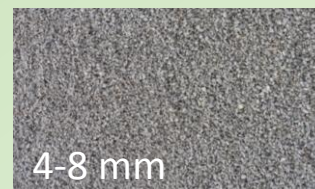

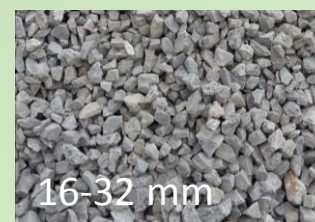

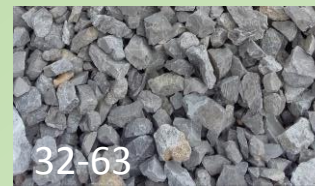

STONES AND GRAVEL

We produce bulk stones and gravel in standard sizes but also customized sizes upon customer request.

We have a production capacity of approx. 2.000 ton pr. day on our two mills.

Our products are annually certified with TSUS certificates for norms: EN 13242: 2002 EN 12620: 2002.

The stone and gravel products are ideal for mix in concrete, construction of buildings, roads and pavements etc.

Product Fractions	Usage
0-4 mm	Fine gravel suitable for use in concrete - in buildings, roads and other civil engineering.
0-8 mm	Suitable for concrete as an alternative to gravel.
4-8 mm	Suitable beneath pavement and concrete in the lower classes as an alternative to gravel, also suitable for winter sanding of roads.
8-16 mm	Suitable beneath pavement and concrete in the lower classes as an alternative to gravel.
0-16 mm	For stone fortification construction areas, roads, sidewalks, drainage embankments.
16-32 mm	For stone fortification construction areas, buildings, roads, drainage embankments etc.
32-63 mm	For stone fortification construction areas, buildings, roads etc.
0-32 mm	Suitable for stone fortification construction areas, buildings, roads, etc.
0-63 mm	For stone fortification construction areas, buildings, roads etc.
0-125 mm	For stone fortification construction areas, buildings, roads etc.
0-300 mm	For stone fortification construction areas, buildings, roads etc.
Other sizes/qualities can be produced upon agreement
